Objective

Motivated IT graduate with hands-on experience from two internships in software development and IT support. Skilled in ReactJS, Flutter, Laravel, Docker, RestAPI's, and SQL. I am eager to apply my technical knowledge and adaptability in a professional setting to contribute to innovative IT projects and learn more.

Skills

- Automation using n8n.
- Programming/Frameworks: C++, Java, Flutter, Dart, PHP (Laravel), JavaScript (Reactjs, JQuery), SQL
- Tools: Git & Github, Docker, VS Code, Postman, n8n
- Core Competencies: Offline-first app development, Database management, REST API integration, IT support, Problem-solving

Internship Experience

Auditing Intern – Marine Engineering Files

Zamboanga Peninsula Polytechnic State University, Accreditation Center | Jun 2023 – Aug 2023

- Assisted in reviewing and organizing marine engineering academic files, ensuring compliance with accreditation standards, which streamlined documentation and reduced errors during audits.

- Gained practical knowledge of documentation processes, Teamwork and attention to detail in an accreditation setting.

IT Support Intern

Assault Armor Battalion, Barangay Cabatangan, Zamboanga City | Jun 2024 – Aug 2024

- Provided first-level support to users, troubleshooting hardware/software issues and configuring workstations, which improved response time and minimized downtime.

- Installed and maintained CCTV systems, enhancing security monitoring capabilities.

Projects Experience

Point of Sale (POS) System – Chef Jose Company

- Started as the backend developer in a 3-person team, building database functions and transaction logic in Raw PHP, JavaScript (JQuery) and MySQL.
- Ended at the final phase, I stepped up as a full-stack developer, completing both frontend and backend tasks to deliver the project successfully.
- The system helped streamline inventory, product and purchase tracking for the company.

SK Salaan Youth Profiling

- Led the development of an offline-first youth profiling system using Flutter, Reactjs, Laravel, SQLite (Drift), and MySQL.
- The system was designed for remote areas with poor connectivity, enabling data collection even without internet access.
- We've helped to reduced manual data errors by 65% and gave me hands-on experience in managing data sync and restapis challenges.

Library System

- Worked as the frontend developer in a 2-person team, focusing on creating a clean and usable interface. The project was built with Raw PHP and MySQL, where I handled the UI while my teammate managed the backend.

OJT Management System

- My friend partnered with me to build an OJT management system using Raw PHP, JavaScript and MySQL. I contributed core features to the project and collaborated through GitHub to keep our work organized and consistent.

Enrollment System – Sta. Maria Elementary School

- Built and optimized the enrollment system using Raw PHP and MySQL, making it scalable and efficient while completing the project end-to-end. The system now supports smoother registration and administrative processes for the school.

Education

Bachelor of Science in Information Technology | [Zamboanga Peninsula Polytechnic State University] | 2025

Certifications

- **Certificate of Internship – Auditing Intern (Marine Engineering Files)** (248 hours) | Zamboanga Peninsula Polytechnic State University, Accreditation Center | Jun 2023 – Aug 2023

- **Certificate of Internship – IT Support** (248 hours) | Assault Armor Battalion, Barangay Cabatangan, Zamboanga City | Jun 2024 – Aug 2024
